

Artwork & Imprint Guidelines

The quality of your design artwork plays a key role in ensuring clear and high-quality printing results. To help us deliver the best imprint outcome for you, we have prepared simple artwork guidelines for your reference.

Layout

Kindly provide detailed layout requirements including size and position of your logo or design. If no specific layout details are provided, our team will arrange the artwork appropriately and send you a digital virtual proof for your confirmation before production.

Proofs

We offer digital virtual proofs upon your request. Any artwork revisions made after production has started will be subject to additional adjustment fees.

Acceptable Digital Artwork Files

Vector files (Recommended):

Please submit your design in .ai, .eps or .pdf format, with all fonts converted to outlines.

Raster files: Image files should be created with a minimum resolution of 600dpi and saved in .tiff or .eps format.

All embedded images must also meet the 600dpi resolution standard.

Adobe Photoshop: Artwork must be designed at 600dpi or higher.

We cannot accept scanned halftone images or scanned multicolor artwork. Acceptable file formats: .tiff, .eps.

Corel Draw:

Please convert all fonts to curves and export your final file as .ai or .pdf. Acceptable file formats: .ai, .pdf, .eps.

For the best printing quality, we do not accept page layout files such as .doc, .pub, .vcf and .dat
